

# Contents

## Number 1

P. P. M. Steur, M. Durieux  
Constant-Volume Gas Thermometry  
Between 4 K and 100 K 1

H. J. Jung  
A Measurement of Thermodynamic Temperatures Between  
683 K and 933 K by an Infrared Pyrometer 19

R. C. Kemp, H. Sakurai  
A Determination of the Thermodynamic Temperature of the  
Triple Point of Neon 33

J.-S. Boulanger  
A New Method for the Determination of Velocity Distributions  
in Cesium Beam Clocks 37

M. Gläser  
An Improved He-Ne Laser at  $\lambda = 612$  nm, Stabilized by Means  
of an External Absorption Cell 45

### Letter to the Editor

A. J. Thor  
On Angles and Angular Quantities 55

A. B. Torrens  
"On Angles and Angular Quantities" Torrens' Reply to Thor's  
Comments 57

Errata 59

## Number 2

R. C. Kemp, W. R. G. Kemp, L. M. Besley  
A Determination of Thermodynamic Temperatures and Mea-  
surements of the Second Virial Coefficient of  $^4\text{He}$  Between  
13.81 K and 287 K Using a Constant-Volume Gas Ther-  
mometer 61

T. J. Quinn, C. C. Speake, R. S. Davis  
A 1 kg Mass Comparator Using Flexure-Strip Suspensions:  
Preliminary Results 87

R. Felder  
He-Ne Laser Stabilized by Saturated Absorption of Methane:  
New Effects Leading to Frequency Shifts 101

T. J. Quinn, J. E. Martin  
A Black-Body Cavity for Total Radiation Thermometry 111

### News from the Laboratories

Physikalisch-Technische Bundesanstalt  
(Braunschweig and Berlin) 115

### Letter to the Editor

W. E. Eder  
In Self-Defence 117

P. Carré, A. J. F. Metherell, T. J. Quinn  
Apropos of: "The Gravitational Field of a 111 Tetrahe-  
dron" 119

## Number 3

H. Bayer  
International Intercomparison of Attenuation in Waveguide  
R 140 (WG 18, WR 62) at the Frequency 15 GHz 121

E. J. Axton  
Intercomparison of Neutron-Source Emission Rates  
(1979-1984) 129

F. Bayer-Helms  
Langzeitige Längenänderungen der Glaskeramik „Zerodur“  
als Auswirkung eines Diffusionsvorganges 145

M. V. Chattle, R. L. Rusby, G. Bonnier, A. Moser, E. Renaot,  
P. Marcarino, G. Bongiovanni, G. Frassinetti, W. Neubert, H.  
G. Fuhrmann, I. Wessel, H. Voorhof  
An Intercomparison of Sealed Cells for Realizing the Melting  
and Triple Points of Gallium 153

P. Gill, R. C. Thompson  
The Preparation and Analysis of Iodine cells 161

B. W. Petley, B. P. Kibble  
A Proposed Method of Measuring  $\gamma_p$  in Terms of the Quantum  
of Magnetic Flux: A Route to  $\alpha$  167

### Letter to the Editor

W. E. Eder  
Plane Angles, Solid Angles, Dimensional Analysis and SI 171

## Number 4

J. D. Cox, B. W. Mangum  
Evaluation of the Triple Point of 1,3-Dioxolan-2-One 173

J. Fischer, M. Kühne, B. Wende  
Laser-Produced Plasmas as Radiometric Transfer-Standard  
Sources for the Vacuum-Ultraviolet and the Soft-X-ray  
Range 179

C. M. Sutton  
The Accurate Generation of Small Gauge Pressures Using  
Twin Pressure Balances 187

R. E. Bedford, C. K. Ma, W. Macready, D. Steski  
Direct Measurement of the Discontinuity in  $dt/dt_{68}$  at  
630.74°C in the IPTS-68 197

N. Bignell  
The Change in Water Density Due to Aeration in the Range  
0-8°C 207

M. Grabe  
Principles of "Metrological Statistics" 213

### Letter to the Editor

G. R. Freeman  
SI Units of Frequency, Angular Velocity, Planck's Constant  
and  $\hbar$  221
